

**Principles of application and methodology of calculating the Seasonal Surcharge Fee
in domestic distribution services provided by
GEODIS Road Network sp. z o. o.**

The Seasonal Surcharge Fee is applied during periods of increased demand for transport services in order to maintain the availability and quality of the services offered.

GEODIS Road Network sp. z o. o. reserves the right to change the amount of the Season Surcharge Fee, the periods and services covered by the fee and the calculation methodology.

The amount of the Seasonal Surcharge Fee in the period 17/10/2023 - 31/12/2023 is 3.5%.

The Seasonal Surcharge Fee applies to domestic distribution services, in particular to the following services:

- Domestic forwarding of groupage freight [LTL DOM]
- Domestic forwarding of part truck load freight [PTL DOM]
- Domestic parcel [PAC DOM]
- Domestic forwarding of non-standard groupage freight [LTL DOM NST]

Seasonal Surcharge Fee is applicable in below periods:

- Easter - from the 10th business day before the holiday to the 4th business day after the holiday,
- Labor Day, Constitution Day - from the 5th working day before 1st May to the 5th working day after 3rd May,
- Corpus Christi - from the 5th business day before the holiday to the 5th business day after the holiday,
- from 17.10.2023 to 31.12.2023 and in the years after that from 1st September to 31st December.

The Seasonal Surcharge Fee is applicable to each shipment picked up in the periods indicated above.

Methodology for calculation

The Seasonal Surcharge is a mandatory addition to GEODIS' remuneration for the performance of the shipping service and increases the base freight rate, to which the Fuel Surcharge and the Road Surcharge are added.

Formula for calculating the total price for the service including the Seasonal Surcharge Fee

OS – Seasonal Surcharge Fee amount expressed as a percentage (in 2023 = 3.5%)

F – Freight (base remuneration rate for forwarding service)

T – Total price for the service*

$$T = (F + F \times OS) + (F + F \times OS) \times \text{Fuel Surcharge} + (F + F \times OS) \times \text{Road Surcharge}$$

*The total price T may include other additional services that are not included in the formula, e.g.: Cash on delivery service, SMS notification, etc.
The prices do not include any necessary taxes at the applicable rates.
